## THE ATC CABINET

The ATX Series is Cubic | Trafficware's ATC Cabinet. It improves upon legacy cabinet designs by implementing modular assemblies, high-density components, serial architecture, 120 VAC or 48 VDC LED signal compatibility, and safety features that protect technicians and the public. The ATX Cabinet can replace any existing legacy cabinet (including Model 33x NEMA TS 1, NEMA TS 2, and ITS Cabinet v1) and is compatible with most existing foundation footprints and bolt patterns.
